Abstract:
Beginning in 1935, the federal Home Owners' Loan Corporation worked with local mortgage lenders to evaluate the "trend of desirability" in residential areas in Hartford and over 200 other cities. The HOLC portrayed its appraisal report in a color-coded map with the highest grade (A) in green and the lowest grade (D) in red. This government agency considered not only housing conditions, but also the "social status of the population," and downgraded neighborhoods with non-white, immigrant, and poor residents. In later decades, these actions became associated with the discriminatory practice of "redlining."

In 2010, as part of the "On the Line" project, MAGIC and Professor Dougherty collaborated to digitize these historical resources and transform them into an interactive map. The appraisal report (on legal size paper) and two large folded maps (Hartford-West Hartford, and East Hartford) were scanned at the National Archives and then pieced together. Textual and numerical report data were entered into a spreadsheet, and the map was geo-referenced and digitized to create a GIS shapefile. The website featuring the interactive map and links to all of the source materials is located at: http://magic.lib.uconn.edu/otl/doclink_holc.html

EXPLANATIONS

The purpose of the Residential Security Map is to graphically reflect the trend of desirability in neighborhoods from a residential viewpoint. Four classifications are used as indicated by the legend, namely: First, Second, Third and Fourth grades. The code letters are A, B, C and D, and Green, Blue, Yellow and Red respectively. In establishing the grade of an area, such factors as these are considered: intensity of the sale and rental demand; percentage of home ownership; age and type of building; economic stability of area; social status of the population; sufficiency of public utilities; accessibility of schools, churches and business centers; transportation methods; topography of the area; and the restrictions set up to protect the neighborhood. The price level of the homes is not the guiding factor.

The First grade or A areas are "hot spots", they are not yet fully built up. In nearly all instances they are the new, well planned sections of the city and almost synonymous with the areas where good mortgage lenders with available funds are willing to make their maximum loans to be amortized over a 10-15 year period -- perhaps up to 75-80% of the appraisal. They are homogeneous; in demand as residential locations in "good times" or "bad"; hence, on the up grade. The Second grade or B areas, as a rule, are completely developed. They are like a 1935 automobile -- still good, but not what the people are buying today who can afford a new one. They are the neighborhoods where good mortgage lenders will have a tendency to hold loan commitments 10-15% under the limit. The Third grade or C areas are characterized by age, obsolescence, and change of style; expiring restrictions or lack of them; infiltration of a lower grade population; the presence of influences which increase sales resistance such as inadequate transportation, insufficient utilities, perhaps heavy tax burdens, poor maintenance of homes, etc. "Jerry" built areas are included as well as neighborhoods lacking homogeneity. Generally, these areas have
reached the transition period. Good mortgage lenders are more conservative in the Third grade or C areas and hold loan commitments under the lending ratio for the A and B areas. The Fourth grade or D areas represent those neighborhoods in which the things that are now taking place in the C neighborhoods, have already happened. They are characterized by detrimental influences in a pronounced degree, undesirable population or an infiltration of it. Low percentage of home ownership, very poor maintenance and often vandalism prevail. Unstable incomes of the people and difficult collections are usually prevalent. The areas are broader than the so-called slum districts. Some mortgage lenders may refuse to make loans in these neighborhoods and others will lend only on a conservative basis.

The map and area descriptions have been carefully checked with competent local real estate brokers and mortgage lenders and we believe they represent a fair and composite opinion of the best qualified local people. In using them we do not mean to imply that good mortgages do not exist or cannot be made in the Third or Fourth grade areas, but we do think they should be made and serviced on a different basis than in the First and Second grade areas.

The area descriptions are arranged alphabetically according to the code letter and numerically.

The following persons collaborated with the field agent in the preparation of this map and the area descriptions:

L. St. C. Burr - Secretary of the Real Estate Board

AREA DESCRIPTION - SECURITY MAP OF HARTFORD, CONN.

1. AREA CHARACTERISTICS:
   a. Description of Terrain. Wooded hillside land rising steeply to the west
      giving beautiful view of the city.
   b. Favorable Influences. Attractiveness of outlook and development.
   c. Detrimental Influences. Distance from center of city, schools, churches and
      stores as well as lack of all city improvements. Those, however, are
      not detrimental to present class of owners.

2. INHABITANTS:

5. CLARIFYING REMARKS: Recent years, some wealthy Hartford citizens began buying up large
   acres and building thereon palatial mansions - one even
   has a golf course on the front lawn. Only occasionally is there found a
   dwelling that is not extremely large. On High Farms Road there has been
   a small, speculative development of the highest order but here the grounds
   are not extensive and houses are built fairly close together. Because of
   instability of owners, mortgagors look with favor on this section although
   it is recognized that there is neither sales nor rental market for this
   type of property. A wide arterial highway separates this area from its
   less desirable neighbor.

   A section opened up a few years ago by a number of speculative developers.
   5. CLARIFYING REMARKS: and one which is growing more rapidly than any other.
   It is the most desirable residential area for those seeking modest sized
dwellings. Architecture is varied but exceptionally pleasing and though
most plots are small, they are well kept. Home ownership is high, the
only rentals being a comparatively few, newly built homes which remain
unsold. Although this area is a favorite with lenders, caution is exer-
cised as some of the new construction is known to be "jerry" built. To
the east, a stream separates this section from its less desirable neigh-
bout.

5. **CLARIFYING REMARKS:** A continuation of Hartford's most desirable residential section containing only homes in the highest brackets. It was begun by wealthy individuals for their own occupancy but speculative developers have recently opened up many streets in the upper western portion with houses of the same high character. Dwellings are very large and of varied but attractive architecture. Grounds are extensive and beautifully landscaped and maintained. Lenders recognize stability of owners but are aware of the impossibility of either selling or renting properties on a satisfactory basis.

5. CLARIFYING REMARKS: This is a sparsely settled area still largely composed of farms. In recent years, there has been a tendency to purchase older homes and completely renovate and modernize them. This has lead to the establishment of a number of large estates and, where land was cheap, to the construction of small modern homes. The variation is so great as to preclude any attempt at classification.

There has been a recent tendency toward the purchase of large tracts which have been turned into estates and the erection therein of sizeable mansions. Some of the new construction, however, has been of more modest nature. Extreme variation prevents proper classification.

5. CLARIFYING REMARKS: A slightly older section which has slowed up somewhat in its development but still retains its desirability. Architecture is substantially similar and not as attractive as in the newer areas. Plots are fairly small giving the air of some congestion. Pride of ownership is generally evident. Lenders look upon this as a sound mortgage section.

5. CLARIFYING REMARKS: A newer development of attractively designed, single family homes with an intermingling of some two family and "Boston" duplexes. Though plots are small, they are well laid out and give the appearance of having good care. Because of stability of owner and both marketability and rentability of properties, this area is one of the favorites among lenders.

6. NAME AND LOCATION: Hartford, Conn. SECURITY GRADE: SECOND AREA NO: B-4
1. AREA CHARACTERISTICS:
   a. Description of Terrain: In the west, ridgeland sloping to the east and west. In the east, land rises from the lowland adjacent to the river.
   b. Favorable Influences: An attractive location with outlook over park.

5. CLARIFYING REMARKS: A somewhat newer section which extends into the Town of Bloomfield. It is largely given over to the Hebrew race although the better class Italians are now also moving there. Architecture is not overly pleasing and lacks variety. Plots are small giving the appearance of some congestion. Though some dwellings are more desirable than the average and show pride of ownership, the area as a whole rates a low "Blue".

6. NAME AND LOCATION HARTFORD, CONN. SECURITY GRADE SECOND AREA NO. B-5
1. AREA CHARACTERISTICS:
   b. Favorable Influences. Attractiveness of development.

5. CLARIFYING REMARKS: A newer section confined to workingmen's homes. Architecture of dwellings is neither varied nor overly pleasing. Plots are small but not so much so as to give the impression of congestion. This is a favorite with the lenders because of stability of income of owners and ready saleability or rentability of properties. The entire northern portion rates a high "Yellow". In the southern portion there are some scattered plants and, while generally similar, rates a low "Yellow".

5. CLARIFYING REMARKS: An older and quite congested residential section of the city. In the eastern portion there are still a number of fine, old homes still maintained by first families but with their passing these are gradually giving way to apartment houses. Because of this trend, caution is advised in making loans.

       A number of years ago, this was the city's best residential section and contained a number of fine, old homes of the leading families. Age and obsolescence set in and many have been altered into either small apartments or rooming houses. Others have been replaced by modern apartments which are particularly practicable owing to the large size of the lots.

5. CLARIFYING REMARKS: An older section of the city which has been developed with an unattractive type of workingman's home. Two and three family dwellings predominate and there are a lesser number of singles with a scattering of multi-family. Plots are narrow giving a somewhat congested appearance and pride of ownership is decidedly spotty. It is worthy of note that some singles are above the average.

5. CLARIFYING REMARKS: A very old and congested portion of the city in which dwellings include all from singles to multi-family. A number of the large, old, one-family homes have been converted into small flats and rooming houses. Many of the two and three contain stores on the ground floor. Throughout the area there are scattered manufacturing plants. Owing to recent purchases by the State, property values along Washington Street have risen. As a whole, the section rates a low "Yellow" and lenders exercise utmost caution.

   An old and congested section of the city where both business and scattered factories are mixed in with every type of dwelling which multi-family predominates. Notwithstanding that much of the area is subject to floods there has been a substantial amount of rehabilitation. The city has purchased the swamp land south of Weeawy Avenue in order to eliminate dumping and slums. Institutional owners have modernized many of the old multi-family tenements. The experience of lenders has been anything but satisfactory.
